

VIETNAM FINANCIAL LOCALIZATION PACKAGE

Align NetSuite ERP with local financial and
accounting requirements

The NetSuite cloud ERP solution delivers a proven financial management system that integrates with your sales and services systems. But this power can't be fully harnessed in Vietnam without the software to help ensure compliance with local financial and accounting requirements.

With BTM Global's Vietnam Financial Localization Package, new or existing NetSuite customers get a localized software package that lets them maximize the NetSuite cloud ERP for business in Vietnam and help comply with all local laws.

Move faster, work easier and save money

Developed and supported by the BTM Global Vietnam team, the Vietnam Financial Localization Package was architected specifically for the NetSuite cloud ERP.

Help meet Vietnamese financial and tax requirements

- Easily issue financial reports
- Help ensure that you are in compliance with local laws

Faster implementations and cost savings

- Avoid manually entering requirements
- Financial data is integrated upon implementation and continually updated automatically

Key features

The Vietnam Financial Localization Package is built on the NetSuite base financial package and can be deployed on top of the NetSuite ERP, allowing both new and existing NetSuite customers to take advantage of the Package's benefits.

- Supports both Vietnamese and English, and can be enhanced to support additional languages
- A seamless user experience that's unaffected by future upgrades to NetSuite financials

Why BTM Global?

The first certified NetSuite Alliance partner in Vietnam and a member of the NetSuite Commerce Agency Program (CAP), BTM Global provides system integration and development services for clients ranging from small regional chains to the world's most recognized brands. Through strategy, development, implementation and support, BTM Global approaches each project as a partnership that helps clients become more seamless, efficient and profitable. Its teams are made up of strategic advisors, problem solvers and proactive partners who examine a project from many angles and perspectives to offer the best solution to a client's challenges.
